Downloading an app

On an iPhone

A guide on how to download an app using an iPhone

1. To download an app using an iPhone open the App store on your phone.

2. You will then be taken to the 'App Store' homepage, here you can browse the apps that are available within the different categories, or if you know the app you would like to download, click on the search button.

4. When you have searched for your app, you will then be shown a few different options. When you have found your desired app, you will then need to press 'GET' which can be seen to the right of the app. Your app will then be downloaded to your device.

If this is your first time using the App Store you will need to enter your Apple ID information or set up an account.
